

## ULTRA Communication Hub and Management Software for Digital Smart Sensors (DSS)

The ultimate comprehensive tool for complete sensor control and diagnostic.

The ULTRA Communication Hub and Management Software for Digital Smart Sensors (DSS) is the most comprehensive communication and configuration tool you can have in your sensor management toolkit. The USB powered device allows you to directly connect Turtle Tough Digital Smart Sensors to your PC to calibrate, configure and manage through our Windows software.

### Features

- Directly connects Turtle Tough Digital Smart Sensors to your PC
- Windows PC Management Software allows:
  - View real-time sensor readings
  - Perform calibrations
  - Access sensor diagnostics and history
  - Determine sensor health
  - Print calibration reports
- USB powered directly from your PC
- Plug and Play Connectivity

ULTRA Communication Hub & Management Software for Digital Smart Sensors  
(Sold separately)

## ULTRA Communication Hub & Management Software

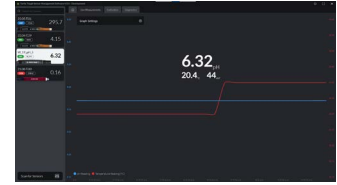

### ULTRA Communication Hub for Digital Smart Sensors

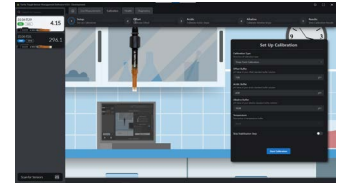

The ULTRA Communication Hub provides an easy plug & play PC interface for all our Digital Smart Sensors (DSS). It is one of the most comprehensive tools you can have for complete sensor communications and diagnostics. The interface provides a USB to RS485 interface for the smart sensors and power to the sensor via the USB power supply. Connecting your Digital Smart Sensors to a PC allows you to use our Windows PC Management Software and connect to third-party applications for programming or control purposes.

Designed for industrial environments, the Digital Smart Sensor PC Interface is housed in a rugged NEMA 4X enclosure and features 3x NEMA 6P quick-connect plugs for simultaneous connection of up to 3 Smart Sensors. This device is a must-have for anyone running Turtle Tough Digital Smart Sensor technology.

### ULTRA Management Software for Digital Smart Sensors

The Turtle Tough Windows PC Management Software provides a powerful tool for communication and configuration. The Digital Smart Sensor (DSS) software allows you to view the sensor readings in real-time, making it ideal for lab or benchtop based work without a benchtop meter or analyser. You also have complete access to sensor diagnostics and critical sensor information for determining sensor health and lifetime. A central part of the software allows you to perform calibrations and print calibration reports.
